## Profile

Operations and Supply Chain-focused professional with hands-on experience in logistics planning, inventory coordination, and cross-functional execution. Combines process structuring, stakeholder coordination, and operational problem-solving with analytics skills in SQL, Python, and Excel.

## Education

**GITAM School of Business, GITAM (Deemed to be University), Visakhapatnam** **2025 – 2027**  
Master of Business Administration

**GITAM School of Technology, GITAM (Deemed to be University), Visakhapatnam** **2021 – 2025**  
B.Tech, Computer Science and Engineering (AI & ML) **CGPA: 6.02**

## Operations & Leadership Experience

**Operations Manager, GStudio Club, GITAM (Deemed to be University)** **Feb 2023 – Mar 2024**

- Led a 10-member team across operations, logistics, documentation, finance tracking, and external coordination for campus events.
- Built execution workflows and role ownership plans to improve day-of-event coordination and delivery reliability.

**Lead, Inventory and Logistics, Shore Fest '23, GITAM (Deemed to be University)** **Oct 2022 – Feb 2023**

- Managed inventory planning and logistics execution with a 20+ member team across multiple event functions.
- Coordinated vendor follow-ups, material movement, and on-ground support to ensure timely setup and operations continuity.

## International Immersion

**International Immersion Programme, Ho Chi Minh City, Vietnam (Van Lang University)** **Feb 2026**

- Completed a nine-day MBA immersion on business strategy, innovation frameworks, and sustainable development in Vietnam.
- Participated in field visits, including Long Binh Metro Depot and Agricultural High-Tech Park, to study transport operations, infrastructure planning, and sustainability practices.

## Professional Experience

**Supply Chain Intern, Port Authority, Visakhapatnam** **May 2026 – Jul 2026**

- Evaluated the operational efficiency of VPA's 262-km iron ore slurry pipeline, highlighting its role in reducing per-tonne logistics costs, easing port-road congestion, and lowering carbon emissions.
- Analyzed railway dwell-time penalties and commodity-specific handling tariffs to assess incentives for faster cargo evacuation and supply chain cost optimization.

## Projects

**Operations Management Project: Hot Chips Company Supply Chain Study** **Sep 2024**

- Studied how a chips company manages production, inventory control, distribution, and point-of-sale movement across the supply chain.
- Connected operations management theory with real-world FMCG practices in coordination, logistics, and strategic distribution.

**Video Summarization using 3D CNNs and Multimodal Learning (IEEE Publication)** **Mar 2025**

- Developed an unsupervised multimodal video summarization model using spatiotemporal learning and attention mechanisms.

## Skills

**Supply Chain & Operations:** Inventory Coordination, Logistics Planning, Vendor Coordination, Process Planning

**Analytics:** SQL, Python, Advanced Excel, Tableau, Power BI

**Tools:** MS Office

**Core Strengths:** Stakeholder Coordination, Communication, Prioritization
